Areas of Expertise

Managed Services & Consulting | Saas/laaS | IT Program & Project Management | Deployments | Dashboarding and execution observability

Project Highlights & Outcomes

- Implemented IT PMO to own the intake, resource management, project lifecycle, budgeting, and accountability of \$10.2M in project deliverables.
- Led the end-to-end optimization of security practices to cut risk by 70% and save \$500K in yearly remediation costs.
- Successfully managed a 25+ Cloud Services team to support project management, service architecture, service desk, customer success, and field services.
- As the founder of a Healthcare IT Program/Project Management consulting firm, Garfield has designed and led over 35 mergers and acquisitions (M&A) including complete network infrastructure, application, domain, and user integration.
- Coordinated Cerner EMR program including 20 concurrent projects.
- Delivered end-to-end support for a comprehensive network infrastructure replacement of a 24x7 facility of 39 IDF's and over 4,000 ports with minimal downtime.
- Customized an enterprise-wide system deployment solution that reduced build times by 74% and improved image quality and user satisfaction.
