

RICHARD BEAVER AUSTIN, TX

Professional & Personal Background

30+ years of professional experience on all three sides of the table having served as a Business Partner, IT Leader, and Management Consultant.

Areas of Expertise & Alliance Alignment

- In the last 10 years, Richard has owned the enterprise data function (including acquisition, storage and consumption, governance, and change management) for several multibillion-dollar companies.
- Experienced envisioning, designing, implementing, and supporting solutions across
- Retail, Consumer Goods, and Healthcare.
- Leverages collaborative leadership skills and cross-domain experience to build and lead high-performing teams focused on architecting and delivering value-based results.

Industry Expertise

Healthcare, Consumer Goods, Retail, & Technology

Project Highlights & Outcomes

While at Whole Foods in Austin, Richard was the executive responsible for integrating key WFM data into the Amazon ecosystem, building security and data governance protocols, and ensuring a seamless transition between legacy and new WFM data on AWS. Over the last 2 years, he has consulted with a major healthcare system in Louisiana and a global consumer company on their data management issues and their cloud 2.0 journey.
